

Ironvale Defense Group

Compliance Matrix Response — RFI FA8629-26-RFI-4ISR

Platform: IV-7 Sentinel attritable ISR UAS | 26 May 2026

POC: Col (Ret.) David Ashford — d.ashford@ironvale.example — (703) 555-0199

Legend: C = Compliant, PC = Partially Compliant, NC = Non-Compliant, E = Exceeds

Section 1 — Compliance Matrix

ID	Code	Remarks
1.1	PC	410 km demonstrated (exceeds 200 km threshold; below 1,500 km objective).
1.2	PC	9.0 hr on station (exceeds 4 hr threshold; below 20 hr objective).
1.3	C	Cruise 10k-20k ft MSL; ceiling 22,000 ft. Performance data at Annex B.
1.4	C	1,000 fpm SL/std day/MGW.
1.5	C	118 KTAS max; 68 KTAS endurance.
1.6	C	MIL-STD-810H qualified: rain, blowing sand/dust, -40C to +50C, 35 kt winds.
1.7	C	T=O met. HMMWV/JLTV transportable; 2 crew; 35 min emplacement; austere-capable.
1.8	C	T=O met. 500 W / 28 VDC payload power; full subsystem integration.
1.9	PC	Secure BLOS (Ku SATCOM) w/ FMV+metadata: met. Link-16: hardware provisioned, certification in progress, available Q3 2027.
1.10	C	Objective met: SAASM GPS, fiber-optic-gyro INS, Alt PNT (celestial + SOOP).
1.11	C	T=O met: secure BLOS C2 and pre-programmed autonomous modes.
1.12	C	Mission planning objective met: automated routing, dynamic re-task, sensor scheduling, deconfliction (ADS-B In + published NOTAM ingest).
1.12	PC	On-board processing: edge processing and ATR met; multi-INT fusion in development (TRL 5).
1.13	C	GCS threshold met incl. separate-site ops; objective met: collaborative analysis (4 concurrent analyst seats) + automated reporting to DCGS/EUD.
2.1	PC	BLOS FMV+metadata at 45 Mbps sustained (50 Mbps burst); Link-16 pending per 1.9.
2.2	C	Objective met: aircraft, sensors, and secure network integration (Type 1).
3.1	C	Objective met: GPS/INS/Alt PNT.
3.2	C	Objective met: flight controls + sensor geo-registration.
4.1	C	T=O met.
4.2	C	Objective met.
5.1	PC	ATR + edge processing met; multi-INT fusion TRL 5 (see 1.12).
5.2	C	Objective met.
6.1	E	Multi-spectral HD imager (VNIR/SWIR/LWIR). GSD 6 cm @ 10,000 ft AGL. Exceeds objective.
6.2	C	T=O met: 8 TB onboard, retained until confirmed EUD receipt.
6.3	C	T=O met: in-mission and post-mission EUD download.
7.1	C	Objective met: 360-deg gimbal + WAMI mode (25 sq km @ 1 Hz).
7.2	C	Objective met: multi-spectral HD FMV. GSD 10 cm @ 4 km slant.
7.3	C	T=O met: 50 Mbps.
7.4	C	Objective met: single-sensor MTI track, 80 km/h vehicle targets.
7.5	C	Objective met: 40 simultaneous tracks.

ID	Code	Remarks
7.6	C	Objective met: 15 km LRF, +/-1 m.
7.7	C	Objective met: STANAG 3733 laser target indication.
7.8	C	T=O met.
8.1	C	T=O met: 20 MHz-18 GHz SDR detector; waveform detail in classified annex.
8.2	C	T=O met.
9.1	C	Additional payloads: SAR (0.3 m resolution), CBRN detector, comms relay.
9.2	C	T=O met for all offered payloads.
10.1	C	See 1.13; both threshold and objective GCS capabilities offered.
10.2	C	T=O met.
KSA-1	C	USAF airworthiness assessment complete for group type (Feb 2026).
KSA-2	C	IFF Mode 3 standard; Mode 5-capable transponder installed.
KSA-3	C	T=O met: secure network integration, air and ground segments.
KSA-4	PC	Current rate 6 aircraft/month; 20/month achievable 6 months after contract start (facility expansion underway). First units 90 days ARO.

Section 2 — Sustainment and Programmatics

Ironvale provides FSR support at up to three forward locations, 30/60/90-day spares packages, organic-level technical orders, MOSA-conformant interfaces (published ICDs), SCRM plan with quarterly supplier audits, and a 12-day combined operator/maintainer course. Facility, storage, and transportation data are provided at Annex C. Detailed pricing is submitted separately as proprietary.
