

Cirrus Defense Corporation

Capability Response — RFI-2026-014

Falcon Eye MX Sensor Pod · 27 August 2026

Overview

Cirrus Defense submits the Falcon Eye MX, currently fielded with two international operators. In the interest of brevity, Cirrus presents its response in matrix form below, keyed to the RFI item numbers.

RFI Item	Requirement	Cirrus Response
3.1	MOSA compliance	Compliant. SOSA 2.0 aligned; OMS/UCI messaging implemented and conformance tested.
3.2	Unit weight	35.9 kg delivered, including mounting hardware.
3.3	Technology readiness	TRL 8. Production-representative units completed operational assessment, 2025-2026.
3.5	First article lead time	18 months from award (includes first-article qualification testing).
3.6	Operating temperature	-54 C to +85 C operating.
3.7	Reliability (MTBF)	6,200 hours demonstrated across the fielded fleet.

Supplementary Notes

Item 3.1: Conformance artifacts from the 2025 third-party assessment are available under NDA. Item 3.3: Operational assessment reports can be provided to the Program Office upon request through appropriate channels.

Production Readiness

The Falcon Eye MX production line in Mesa, Arizona currently operates at four units per month with surge capacity to seven. The information contained herein is provided for planning purposes only.
